Explanation of Symbols used : **O—Cases ; D—Deaths.**

S. P. JAIN,
for Registrar General, India.

NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 28th April, 1951.

* In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

† Figures not available.

Explanation of symbols used :— B = Birth ; B.R. = Birth rate ; C = Cholera ; S = Smallpox ; P = Plague ; F = Fevers ; D.D. = Dysentery and Diarrhoea ; R.D. = Respiratory Diseases ; M.D. = Maternal deaths ; D.R. = Death rate ; I.D. = Infantile Deaths (included total deaths).

REMARKS

The figures of births and deaths shown in this statement for the week ending the 28th April, 1951, relate to 164 towns with an estimated population of 24,520 thousands. The total number of towns is 234 and their population is 29,017 thousands. Thus 79% of the total number of towns representing 85% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 14,473 and 8,828 representing birth and death rates of 30.7 and 18.7 per thousand of population respectively.

(A) *States (Parts A & C).*—The data here relate to 166 towns with an estimated population of 22,541 thousands. Information about Assam, and Bihar could not be included. The total number of towns is 202 and their population is 25,187 thousands. Thus 82% of the total number of towns representing 89% of the total population is covered. The numbers of births and deaths recorded in these towns were 13,518 and 8,302 representing

birth and death rates of 31.2 and 19.2 per thousand of population respectively. The table at the end gives the position of States.

The towns of Nellore and Tanjore in Madras recorded high death rates of 52.0 and 62.3 per thousand of population respectively. In Nellore, the high death rate was not due to any one of the specified causes and in Tanjore there was a large number of deaths due to deaths from respiratory diseases.

(B) *States (Part B).*—The data here relate to 18 towns with an estimated population of 1,979 thousands. The total number of towns is 32 and their population is 3,830 thousands. Thus 56% of the total number of towns representing 52% of the total population is covered. The numbers of births and deaths recorded in these towns were 955 and 526 representing birth and death rates of 25.1 and 13.8 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
